

# Make a Periscope

CLIPS

1 Glue a piece of squared paper (9 squares x 8 squares) onto some card. Draw this shape on it.

2 Cut the shape out and fold it like this. Fix the gluing tab to hold the box together.

3 Fix small mirrors, or pieces of mirrored card on the slopes at the top and bottom of the box.

4 Look through the spaces onto the mirror to see over a crowd or around corners.

*In the video clip I have used an ordinary shoebox.*
